

Engagement. Leadership. Collaboration.

The Newbridge experience is like none other.

Newbridge Academy is designed to provide a challenging, interactive environment for students in the 21st century. We cultivate an environment where students strive for academic excellence, while providing them with the tools to succeed.

Our small class sizes facilitate optimal interaction with our experienced teachers. Students benefit from a variety of methods and strategies in the delivery of engaging lessons, which encompass a wide range of academic topics.

Enriched academics, combined with athletic excellence, enables our students with the unique opportunity to develop personal qualities of leadership, work ethic and fortitude as they transition between the two facets of their daily routine. Our teaching staff invest in our student body, supporting them to become independent, critical thinkers who take risks in their learning and solve problems effectively.
